ZoneTrack -Covid19

Track probable positive people and get alerts for zone.

Problems

Problem 1

No visual info of current covid19 zones in India

Problem 2

No track of people travelling in and out of red zones

Problem 3

People moving inter-state won't be quarantined.

Utopia

Solution 1

Track of person's movement w.r.t varying zones

Solution 2

Provide visual representation of zones via HERE maps api.

Solution 3

Marking person pointer red/orange/green in accordance to the zones the person has been in

Product or service

The idea not only helps, people to be aware of entering harmful zones and be in contact of potential positive people, but also may help govt. to keep a track of people moving in and out of various zones. And thus proper screening and quarantine can be done for the people moving inter-state and intra-state.
